***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 21-34, drawn to a visual display of messages in an aircraft, classified in class 340, subclass 945.
- II. Claims 9-17, drawn to the retrieval of audio messages from memory, classified in class 369, subclass 30.01.
- III. Claims 18-20, drawn to a voice recognition system, classified in class 704, subclass 246.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the first invention is drawn to a visual messages display for displaying a prioritize message to the pilot. The subcombination has separate utility such as message retrieval from memory and voice recognition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
